

ABSTRACT

In one embodiment, the methods and apparatuses sequester content receiving content for use in an application; review the content; automatically sequester the content from the application based on the reviewing; and form a reason associated with the sequestering the content. In another embodiment, the methods and apparatuses receive content for use with an application; determine whether the content is one of acceptable content and unacceptable content; remove the unacceptable content from the application; form an explanation for the unacceptable content; and store the unacceptable content and the explanation in an off-line storage device.
